Ground Collar - Diameters	108 (ID) 385 (OD)		125 (ID) 385 (OD)				145 (ID) 385 (OD)				195 (ID) 445 (OD)					

Please note that the ground collar (M) is an optional extra

Key: (ID) = Internal Diameter (OD) = Outside Diameter

### Glassfibre Flagpole Guarantee

We guarantee that all hinged ground mounted glassfibre flagpoles which have been properly installed according to our instructions will withstand winds of up to 100mph while flying a flag of not more than 25 % of the poles height in length. Damage resulting from vandalism or other hazards are not covered by this guarantee. Freight, fittings, accessories, installation and materials are not covered by this guarantee and are the liability of the client.

When looking at prices between different suppliers, compare the naked flagpole weights quoted.

Lighter poles use less glassfibre and have thinner walls. **They are less durable and are more likely to break.**

**Harrisons poles are guaranteed because they use thicker walls and a wider taper.**
