

COMMERCIAL FLAGPOLE HOISTABLE SWIVEL ARM

PRODUCT OVERVIEW

UK manufactured, available in lengths from 6 to 12 metres, our flagpoles are regarded by architects and engineers as the very best in the UK.

The hoistable swivel arm allows you to change your flag easily without having to lower the main flagpole, therefore it's perfect for promoting special offers or seasonal events. The lowering mechanism is locked away inside the pole behind an anti vandal metal door.

The arm, which comes complete with a gold onion finial holds your portrait flag and swivels on the flagpole to ensure the flag always follows the wind so your message will always be seen.

Heavy duty as standard, with extra heavy duty and ultra heavy duty options available, all flagpoles are able to withstand winds of up to 100mph unflagged. With a 10 year guarantee on the flagpole, you will have that further peace of mind.

Extra heavy duty poles are advised for windy locations whereas ultra heavy duty poles are advised for coastal towns.
