

FORECOURT FLAGPOLE PERIMETER

PRODUCT OVERVIEW

Whether your business is off the beaten track, on an industrial estate or fronting up a busy road, a flagpole catches a potential customer's eye and announces your location. It makes you easy to be seen and found – even when sat navs go astray. Our flagpoles are tough and made to withstand up to 30mph wind. The optional heavy duty swivel arm is the strongest on the market to ensure your flagpoles always look their best. They also come with a 2 year warranty for extra peace of mind.

The 60mm diameter aluminium flagpoles are available in heights from 4 to 6 metres with external halyard for landscape flags or heavy duty swivel arm for flying portrait flags. They can be installed into concrete or grassed areas using a ground sleeve, or the optional ground screw can be used as a temporary solution in soft ground.
